Delivering Innovation in **Power Engineering**

who we are

EA Technology Instruments is a specialist Business within the EA Technology Group, working to meet the needs of power asset managers around the world.

Our mission is to produce leading edge, innovative products, which add tangible commercial benefits to the businesses of our customers.

Our products are designed to improve the performance of assets by extending life, increasing throughput, maximising availability and reducing operating costs.

We support all the instruments we supply with:

Training – we are a member of the Continuous Professional Development Certification Service, running a wide range of courses for power asset engineers and managers.

Spares and repairs – we have full spares backup and workshop facilities.

Maintenance – including periodic instrument checks and calibration.

Upgrades – we can update many of our older instruments to the latest versions.

**AWARD
WINNING
PD INSTRUMENT**

**UltraTEV
Detector**

UltraTEV Detector™

PRODUCT CODE: UT2

The world's first dual sensor handheld partial discharge detection instrument is a global best seller, which is in service from Houston to Hong Kong.

benefits

- Highly effective in 'first pass' asset condition surveys
- Very low training requirement
- Essential personal safety device
- Low cost, high productivity

features

- Ultrasonic and TEV detectors in a single handheld unit
- Calibrated to detect critical PD activity instantly
- One button operation
- Light, portable and easily deployed

Note: all mains-powered instruments are available with plugs to suit local requirements.

accessories and options

UltraTEV Calibration Checker™

Save time and money with this handy unit. It instantly checks whether your UltraTEV Detectors™ are correctly calibrated – so they only need sending to us for adjustment when necessary. The Calibration Checker itself only needs calibrating after 12 months

PRODUCT CODE: UTCC

Function Checker

Instantly checks whether your UltraTEV Detector™ is functioning correctly

PRODUCT CODE: UT2-FC

UltraTEV Case

Dedicated carry case for the UltraTEV Detector™

PRODUCT CODE: UT2-CAS

Rubber Sleeve

PRODUCT CODE: UT2-RS

In-Car Charger

12V battery charger for the UltraTEV Detector™

PRODUCT CODE: UT2-CC

Battery Charger

Mains battery charger for the UltraTEV Detector™

PRODUCT CODE: UT2-BC

service packs

UltraTEV service pack 1

Add-on for UltraTEV Detector™ and UltraTEV Plus+™ owners includes:

- Benchmark PD Survey of up to 30 assets
- On-site training in use of UltraTEV Detector™ or UltraTEV Plus+™
- 12 month technical support
- FREE instrument calibration after 12 months

BEST SELLER

UltraTEV Plus+™

**Multi-functional Partial Discharge (PD)
investigator**

PRODUCT CODE: UTP1

All the features of our award-winning
UltraTEV Detector™ - plus a great deal more.

benefits

- Measures accurate data on PD activity.
- Works with many different types of assets
- Highly user friendly with little training required
- Low ownership cost - one instrument replaces several
- Excellent value and return on investment

features

- The core functionality of our UltraTEV Detector™ and UltraMet Plus+™ – all in one hand-held instrument!
- Detects and measures PD activity as numerical values for both ultrasonic and TEV emissions
- Menu-driven backlit colour screen and keypad, with multiple functions
- Locate and listen to ultrasonic PD activity with headphones included
- Switchable modes: one-shot PD detection or continuous measurement

Kit 1

PRODUCT CODE: UTP1 Kit 1

Inc. Function Checker, Clip-on Headphones, Battery Charger and Systainer Carrying Case with high density foam insert.

Kit 2

PRODUCT CODE: UTP1 Kit 2

Inc. Peltor Neckband Headset, Ultrasonic Contact Probe, Flexible Sensor, Function Checker, Battery Charger and Systainer Carrying Case with high density foam insert.

Kit 3

PRODUCT CODE: UTP1 Kit 3

Inc. Peltor Neckband Headset, Ultrasonic Contact Probe, Flexible Sensor, UltraDish, Function Checker, Battery Charger and Systainer Carrying Case with high density foam insert.

accessories and options

UltraDish™ Parabolic Waveform Concentrator

The UltraDish™ is ideal for investigating PD activity in overhead assets or at a distance. Includes carrying case

PRODUCT CODE: UTP1-UD

Peltor Neckband Headset

Medium attenuation, low-profile shells for easy and comfortable use together with other PPE devices

PRODUCT CODE: UTP1-PH

Battery Charger

Mains battery charger for the UltraTEV Plus+™

PRODUCT CODE: UTP1-BC

Flexible Sensor

Plug-in flexible microphone extension enables you to probe enclosures and tight spaces

PRODUCT CODE: UTP1-FS

Function Checker

Instantly checks whether your UltraTEV Plus+™ is functioning correctly

PRODUCT CODE: UTP1-FC

UltraTEV Plus+ Case

Available for Kit 1, Kit 2 and Kit 3

PRODUCT CODE: UTP1-CAS

Ultrasonic Contact Probe

Detects surface discharge activity through ultrasonic vibrations

PRODUCT CODE: UCP1

service pack 1

UltraTEV Plus+

Add-on for UltraTEV Detector™ and UltraTEV Plus+™ owners includes:

- Benchmark PD Survey of up to 30 assets
- On-site training in use of UltraTEV Detector™ or UltraTEV Plus+™
- 12 month technical support
- FREE instrument calibration after 12 months

service pack 2

UltraTEV Plus+

Add-on for UltraTEV Plus+™ owners includes:

- Full benchmark survey including PD Survey, Live Tank Oil Sampling (LTOS™) and analysis, plus trip timing tests
- Collection of condition data and history to prepare asset register with health indices
- Control of hazard database
- 12 month periodic collection of oil samples and trip time tests, returned to EA Technology for analysis and recommended actions
- 12 month technical support
- FREE instrument calibration after 12 months

Note: all mains-powered instruments are available with plugs to suit local requirements.

Direct sales: +44 (0) 151 339 4181 sales@eatechnology.com

UltraMet Plus+™

Versatile ultrasonic PD measurement tool

PRODUCT CODE: UMP1

A highly sensitive ultrasonic listening device, which provides instant indications of levels of surface PD activity, in the form of decibel readings AND audible sound.

benefits

- Gather and record detailed data on PD activity in multiple assets
- Measure changes in activity over time
- Identify need for further condition assessment or maintenance intervention
- UltraDish™ option for even greater versatility

features

- Take multiple decibel readings of PD activity
- Listen for PD activity over headphones
- Compare levels between faulty and fault-free equipment
- Kit includes headphones, battery charger and case

Note: all mains-powered instruments are available with plugs to suit local requirements.

Kit 1

PRODUCT CODE: UMP1 Kit 1

Inc. Function Checker, Clip-on Headphones, Battery Charger and Systainer Carrying Case with high density foam insert.

Kit 2

PRODUCT CODE: UMP1 Kit 2

Inc. Peltor Neckband Headset, Ultrasonic Contact Probe, Flexible Sensor, Function Checker, Battery Charger and Systainer Carrying Case with high density foam insert.

Kit 3

PRODUCT CODE: UMP1 Kit 3

Inc. Peltor Neckband Headset, Ultrasonic Contact Probe, Flexible Sensor, UltraDish, Function Checker, Battery Charger and Systainer Carrying Case with high density foam insert.

accessories and options

UltraDish™ Parabolic Waveform Concentrator

The UltraDish™ is ideal for investigating PD activity in overhead assets or at a distance. Includes carrying case

PRODUCT CODE: UTP1-UD

Peltor Neckband Headset

Medium attenuation, low-profile shells for easy and comfortable use together with other PPE devices

PRODUCT CODE: UMP1-PH

Battery Charger

Mains battery charger for the UltraMet Plus+™

PRODUCT CODE: UMP1-BC

Flexible Sensor

Plug-in flexible microphone extension enables you to probe enclosures and tight spaces

PRODUCT CODE: UTP1-FS

Function Checker

Instantly checks whether your UltraMet Plus™ is functioning correctly

PRODUCT CODE: UMP1-FC

UltraMet Plus+ Case

Available for Kit 1, Kit 2 and Kit 3

PRODUCT CODE: UMP1-CAS

Ultrasonic Contact Probe

Detects surface discharge activity through ultrasonic vibrations

PRODUCT CODE: UCP1

UltraTEV Locator™

Portable Partial Discharge (PD) investigation system

PRODUCT CODE: UTL1

benefits

- Locating and measuring PD activity to identify faults BEFORE they lead to failures
- Recording and analysing PD activity to provide valuable information on the actual condition of assets
- More effective asset management, reliability, efficiency and safety, at lower cost

features

- Ability to pinpoint PD activity to within 10cm
- Ultrasonic and TEV sensors for surface and internal PD
- Factors in environmental conditions: temperature, atmospheric pressure and relative humidity
- Measures and records the severity of PD, for diagnostic analysis
- Works with cables and overhead assets
- Tough, weatherproof case, with built in 13 hour battery life
- Built in function checker for TEV and Ultrasonic
- USB data storage

UltraTEV Locator™ standard kit includes

- TEV/Magnetic Probe
- TEV/Ultrasonic Probe
- Ultrasonic Contact Probe
- Flexible Sensor
- Non Contact Temperature Probe
- RFCT
- Peltor Neckband Headphones
- AC Reference Source
- Battery Charger
- Carry Case

Note: all mains-powered instruments are available with plugs to suit local requirements.

accessories and options

UltraDish™ Parabolic Waveform Concentrator

The UltraDish™ is ideal for investigating PD activity in overhead assets or at a distance. Includes carrying case

PRODUCT CODE: UTP1-UD

Accessories Case

Carry case for main unit and accessories

PRODUCT CODE: UTL1-ACAS

Battery Charger

Mains battery charger for the UltraTEV Locator+™

PRODUCT CODE: UTL1-BC

Flexible Sensor

Plug-in flexible microphone extension enables you to probe enclosures and tight spaces

PRODUCT CODE: UTP1-FS

RFCT

Clamp on current transformer for Cable PD

PRODUCT CODE: UTL1-RFCT1

UltraTEV Locator™ Case

Protective carry case for main unit

PRODUCT CODE: UTL1-CAS

Ultrasonic Contact Probe

Detects surface discharge activity through ultrasonic vibrations

PRODUCT CODE: UCP1

Probes

TEV/Ultrasonic Probe and TEV/Magnetic Probe

PRODUCT CODE: UTL1-P

Cables

Set of two 2 metre Probe cables (standard)

PRODUCT CODE: UTL1-C2

Non Contact Temperature Probe

PRODUCT CODE: UTL1-TP

AC Ref. Source

Phase reference source

PRODUCT CODE: UTL1-AC

Extra Length Cables

Set of two 4 metre Probe cables

PRODUCT CODE: UTL1-C4

UltraTEV Alarm™

The PD activity early warning system

PRODUCT CODE: UTA1 + UTAH

Continuous monitoring of substation switchgear. Identifies faults and safety issues BEFORE they lead to failures.

benefits

- Early warning of faults prevents failures
- Enables timely interventions when maintenance is required
- Warns personnel if switchgear is in a dangerous condition
- Excellent cost/benefit justification

features

- Effective continuous monitoring with both ultrasonic and TEV sensors
- Multi-node sensor units can monitor 100+ assets simultaneously
- Simultaneously measures local humidity and temperature conditions
- Central hub unit LED indicators provide immediate indication of PD problems
- Receive alerts anywhere, via email or text message

additional info

- 110 or 230V AC Supply.

UltraTEV
Alarm System

THE QUEEN'S AWARDS
FOR ENTERPRISE
2011

accessories and options

Hub with GPRS Option

Receive condition alerts instantly via SMS text messages or email, with this GPRS enabled version of the hub. Measures local humidity and temperature conditions

PRODUCT CODE: UTAH-GPRS

Hub without GPRS

Volt-free contacts for optional SCADA connection

PRODUCT CODE: UTAH

Additional Sensor Nodes

Built in TEV sensor complete with airborne ultrasonic microphone

PRODUCT CODE: UTA1

Ultrasonic Node

Works directly with the Alarm Hub, monitoring ultrasonic PD emissions only. Can be daisy-chained. Used when additional Ultrasonic Measuring Points are required

PRODUCT CODE: UTA-UN1

Short Microphone with Magnetic Base

PRODUCT CODE: UTA-SM

Long Microphone with Magnetic Base

PRODUCT CODE: UTA-LM

Close Coupled Ultrasonic Sensor

PRODUCT CODE: UTA-US

Alarm Node Calibration Checker™

Instantly checks that your Alarm Nodes are operating within specification

PRODUCT CODE: UTCC

Portable 10 Node System Case

Waterproof, robust, pull along case with foam inserts

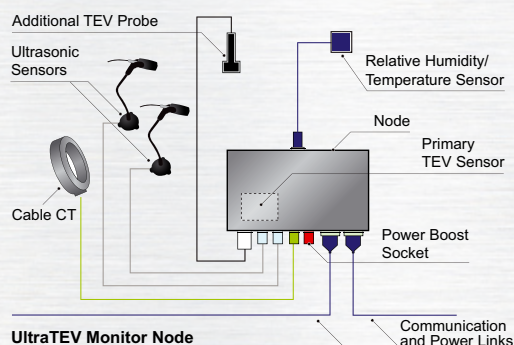

PRODUCT CODE: UTA-CC

multiple assets

The web-enabled UltraTEV Monitor™ can support and process condition data from up to 250 measuring points simultaneously, all with precedence between them.

The modular nature of the system makes it equally suitable for large or small substations, continuously monitoring all types of MV and HV assets, including cables.

multiple sensors

Each UltraTEV Monitor™ measurement node is capable of measuring PD activity and the environmental factors which affect it in FIVE ways:

TEV	Built-in TEV sensor, plus additional plug-in TEV probe.
Ultrasonic	Via plug-in external sensors.
Temperature	Built-in contact sensor, plus plug-in external sensor.
Humidity	Via plug-in external sensors.
RFCT	Cables are monitored via plug-in Radio Frequency Current Transformer (RFCT).

UltraTEV Monitor™

Complete asset monitoring and alarm system

PRODUCT CODE: UTM

The most comprehensive PD (Partial Discharge) monitor ever developed.

benefits

- Early identification of asset deterioration
- Measurement and analysis of PD activity to identify faults BEFORE they lead to failures
- Valuable information provided on the actual condition of assets
- More effective asset management, reliability, efficiency and safety, at lower cost

features

- Detection – Continuously checks for the presence of PD activity on the surface of insulation internal to components and in cables
- Measurement – Uses time-of-flight measurement to a resolution of 2ns (nanosecond) to locate the source of PD activity to within 60cm
- Monitoring – Monitors changes in PD activity over time, including noise, temperature and humidity to eliminate false readings
- Recording – Records PD activity in all assets being monitored over time

accessories and options

Total PD Monitoring detecting surface discharge activity in sealed chambers

Ultrasonic Contact Probe™

PRODUCT CODE: UCP1

Compatible with:

- UltraTEV Plus+™
- UltraMet Plus+™
- UltraTEV Locator™

UltraTEV Monitor Contact Probe™

PRODUCT CODE: UCP2

Compatible with:

- UltraTEV Monitor™

benefits

- Detects surface discharge activity within sealed chambers by direct contact with the exterior metalwork
- Proven under controlled conditions to be one of the most sensitive instruments available
- Noise caused by varying contact pressure eliminated by magnetic clamping

features

- Tuned to accurately identify ultrasonic frequencies associated with surface discharge
- Robust construction for long life
- Magnetic mounting for hands-free use
- Designed for use with EA Technology's PD instrumentation range

PD Simulator™

PRODUCT CODE: PDS

The popularity of the UltraTEV range of PD Instruments means that large numbers of Condition Assessment Engineers require training to ensure effective use of these instruments.

EA Technology has developed the PD Simulator to realistically simulate Transient Earth Voltage (TEV) signals, similar to those generated by internal partial discharge, and ultrasonic signals similar to the signals associated with surface discharge.

The PD Simulator allows Engineers to become familiar with the responses of their hand held instruments before being exposed to the live substation environment.

benefits

- Gives an appreciation of the difference between internal and surface discharge detection methods
- Assists familiarisation with the noise characteristics of ultrasonic surface PD activity
- Exposes personnel to measurable partial discharge as part of their training
- Partial Discharge training can be accomplished in a safe environment

features

- Generates 5 levels of TEV signals
- Generates 5 levels of ultrasonic sound
- 4 modes of realistic ultrasonic noise available for each sound level
- 7 hours continuous use from fully charged battery
- Plug in lead with either magnet or 'crocodile' clip to transfer TEV signals to switchgear etc

Note: all mains-powered instruments are available with plugs to suit local requirements.

The PD Monitor GIS™ continuously monitors PD activity via external sensors, which are daisy chained to an intelligent server.

PD Monitor GIS™

24/7 Partial discharge (PD) monitoring system for gas insulated switchgear

For automatic, continuous monitoring of mission critical GIS assets.

benefits

- Most cost effective and multi-featured GIS condition monitor available
- Continuous monitoring identifies PD faults before they lead to failures
- 24/7 assurance that critical GIS assets are PD free
- Instantly alerts operators if PD faults are present
- Provides detailed information on PD fault location, severity and frequency
- Dramatically reduces the need for expensive technician call-outs
- New design based on 35+ years experience of PD detection and measurement
- Unique configuration requires minimal wiring

features

- Accurately locates the source of PD activity
- Expert system software automatically provides detailed fault information without the need for analysis by experts
- Daisychain configuration minimises wiring and makes installation simple

Note: all mains-powered instruments are available with plugs to suit local requirements.

PD Monitor GIS™

Gas Insulated Switchgear Monitoring System

suitability

The PD Monitor GIS™ is purpose designed as a retrofit system for all commonly used pressurised EHV Gas Insulated Switchgear (GIS) equipment.

The modular system can cover over 100 sensor points, making it effective for a wide range of GIS assets.

Its unique 24/7 monitoring and diagnostic capabilities make it particularly suitable for monitoring mission critical substations on transmission networks.

valuable activity data

Example: Plot of PD activity against phase of the busbar voltage.

- Shows PD activity by location, type, rate, magnitude and severity (magnitude + rate)
- Plots PD activity as easy-to-read graphs
- PD activity alert thresholds are user-configurable

LOCATES PD ACTIVITY ACCURATELY and QUICKLY

PD Locator™

PRODUCT CODE: PDL1

The PD Locator™ includes a FREE PD Locator™ Function Checker, which automatically tests functions, accuracy and timing.

An effective instrument for rapidly detecting, measuring and locating the source of PD activity with pinpoint accuracy.

benefits

- Essential equipment for power engineers
- Locate faults before they lead to failures
- Quantify PD activity
- Use with the PD Monitor™ for detailed assessment of asset condition
- Ability to detect multiple PD sources

features

- Measures PD activity accurately in single probe mode
- Quickly locates the source of PD activity in two-probe mode
- Portable and easy to use
- Includes Function Checker, probes, battery charger and case

Note: all mains-powered instruments are available with plugs to suit local requirements.

PRODUCT CODE: PDL1-FC

Upgrade - NiMH Battery

(Old units only)

PRODUCT CODE: PDL-NIMH

Upgrade Membrane Front Panel

(Old units only)

PRODUCT CODE: PDL-FPU

Full Lightweight Upgrade (Old units only)

Includes:

- Membrane front panel
- Membrane probes
- 5mm coax cables
- Function Checker
- Lightweight NiMH battery pack

PRODUCT CODE: PDL1-LWU

PD Monitor™

PRODUCT CODE: PDM03CF

Monitors, records, locates and analyses changes in PD activity over time, using 12 probes. An extremely valuable condition assessment tool.

benefits

- Non-intrusive monitoring means no lost production
- Effectively screens out external interference using full 12 channel precedence detection
- Records PD variations caused by changes in the operating environment over time
- User-friendly analytical software provides essential management information
- Optional downloading via modem – for expert analysis by EA Technology

features

- Continuously monitors up to 12 locations simultaneously, using Precedence Detection technology
- Remote data access capabilities, plus data storage on CompactFlash® card
- Includes standard PC data analysis software, remote access modem, probes, aerials and carrying case
- Portable and easy to deploy

Note: all mains-powered instruments are available with plugs to suit local requirements.

CableSniffer™

Finds underground cable faults FAST

PRODUCT CODE: CS1

Locate underground LV faults in minutes, with fewer excavations, less disruption and lower costs.

benefits

- Rapid results save time and money
- Fewer holes – so less disruption and reinstatement
- Improved customer service – faults fixed more quickly
- Excellent return on investment – typically pays for itself in days

features

- Locates faults on all LV power cables
- Accurate to within 1 metre
- Lightweight, portable and easy to use
- Includes sensor probes, spare filter papers, battery charger and carry case

Note: all mains-powered instruments are available with plugs to suit local requirements.

in the field**

PURL™

The Pole Ultrasonic Rot Locator

PRODUCT CODE: PURL

Take the guesswork out of measuring rot in pine poles and estimating their residual strength.

benefits

- Simple and quick to use
- Compatible with field data gathering equipment
- Accurate condition assessment replaces guesswork
- Essential for network reliability and safety

features

- Proven ultrasonic technology with minimal intrusion into pole
- Software maps internal rot and calculates pole strength
- Rugged battery-operated construction
- Includes transmitter, receiver, tape measure, elastic ropes and carry case

accessories and options

Power Setting Tape

Instrument Positioning Straps x2

PRODUCT CODE: PURL-IPS

PURL™ Analytical Software CD

PRODUCT CODE: PURL-ASCD

PURL™ Carry Case

PRODUCT CODE: PURL-CC

Polarity Test Kit™

LV live conductor test kit

PRODUCT CODE: PTK1

Complete self-testing system. Comprising of the Polarity Test Pen and Test Pen Checker.

The safest way to check which conductors are live.

benefits

- The Polarity Test Pen™ is far more accurate and versatile than standard conductor testers
- The Test Pen Checker™ instantly confirms that the Polarity Test Pen™ is working correctly
- Easy to use
- Double checks whether conductors are live or dead
- Essential for operator safety

Polarity Test Pen™

PRODUCT CODE: PT1

The Polarity Test Pen™ is the new version of our popular Polarity Tester™. It works by lighting up and buzzing when it detects the electrical field surrounding a live LV insulated conductor.

features

- Lights up ONLY within 3mm of the live core of a standard 3mm conductor
- Discriminates between live and non-live conductors – even in bundles of cables
- Does not require current flow in the live conductor
- Works with all standard 220-250V 50/60Hz supplies
- Daylight LED illumination
- Audible buzzer
- Rugged construction, with pen-style pocket clip
- Uses 2 x AAA standard batteries included
- Range of body colours – can be overprinted with your company logo

Test Pen Checker™

PRODUCT CODE: TPC1

The Test Pen Checker™ instantly confirms whether the Polarity Test Pen™ is functioning correctly. It works by simulating the field produced by a live LV conductor.

features

- Instant function check

STEP 1 - Insert the Polarity Test Pen™ into the Test Pen Checker™. The unit automatically powers up and its test light illuminates

STEP 2 - Polarity Test Pen™ tip lights up and buzzer sounds to confirm correct functioning

STEP 3 - Remove Polarity Test Pen™ from unit and check for live conductors

STEP 4 - Retest the Test Pen™ to ensure correct operation for 100% confidence

- Self powered and portable
- Long life, maintenance free battery
- Rugged construction protects your Polarity Test Pen™ when not in use
- Clip on Lanyard

Extended Volt Stick™

Identify damaged underground cables in safety

PRODUCT CODE: EV1

Simple and safe – the Volt Stick's lamp lights up when in the proximity of a live conductor.

benefits

- Ideal for identifying cables damaged by excavations e.g. roadworks
- Operator stays at a safe distance from the cable
- Can be used to check pole mounted fuses
- Lightweight and portable

features

- 600mm long – sensor at one end, lamp at the other
- Does not require current flow in the live cable
- Battery powered
- Easy to use with minimal training

Uses 2x AAA batteries - included

accessories and options

Clips

to attach the Extended Volt Stick™ to a 'hot stick'

repair and calibration service

As a manufacturer of measurement and detection instruments, it is important for EA Technology to provide the best quality service for our products. Maintain your EA Technology instruments to keep them in perfect working conditions with the knowledge of our skilled Technicians.

Helicopter Inspection Service

Electricity Tower Condition Assessment

A complete airborne service for the inspection and management of power lines, providing a comprehensive breakdown of the condition of each tower.

benefits

- Provides tailored information to feed into EA Technology's Condition Based Risk Management (CBRM) process
- Inspects your network in a quicker, more comprehensive and cost-effective way than conventional foot and climbing inspections
- Uses a standardised and consistent method for objective condition assessment
- Produces a permanent photographic record for regulatory, legal and auditing purposes
- Delivers a written summary report which facilitates objective prioritisation of maintenance and remedial work using Health Indices
- Enhances strategic planning and investment decision making using Condition Based Risk Management (CBRM)

condition based risk assessment of electricity towers

inspection process overview

Each airborne assessment is specifically tailored to your requirements, your industry and the relevant regulations with which you have to comply. The following flowchart details the step-by-step process:

```

graph LR
    A[Identify your requirements] --> B[Select your inspection]
    B --> C[Plan the flight]
    C --> D[Capture the images]
    D --> E[Assess the conditions]
    E --> F[Condition Based Risk Management (CBRM)]
    F --> G[Health Index (if available)]
    D --> H[Identify emergency action]
    E --> I[Maintenance Report]
  
```

a complete cost-effective assessment

An airborne Electricity Tower Condition Assessment from EA Technology is an efficient and effective way to meet both your regulatory obligations and your strategic asset management objectives. Each assessment captures a large number of highly-detailed GPS-tagged digital images of each tower, which allow us to provide a detailed condition assessment of the tower structure and fittings. From this we can determine Health Indices for prioritising maintenance and remedial work, which can also be used in our unique Condition Based Risk Management (CBRM) process, to help with strategic network decision making and investment planning.

The inspection results format can be tailored to suit the requirements of your business model and the specific demands of your utility, with all results electronically cross-referenced for a range of uses and legal records. You'll even be able to 'fly' the network yourself from your desk to see the results.

maximum information from a single visit

An airborne Electricity Tower Condition Assessment is a consistent and reliable means of obtaining and capturing all the information you need in one visit, avoiding the need for costly separate visits such as:

- Safety and security tool inspection (e.g. signage and anti-climb guards)
- Routine climbing inspection
- Detailed refurbishment climbing inspection
- Thermal inspection can be performed at the same time

What's more, an airborne inspection avoids the need for network isolation and HV switching.
